

NATIONAL SCIENCE FOUNDATION

**Notice of Permit Applications Received
Under the Antarctic Conservation Act of 1978**

AGENCY: National Science Foundation

ACTION: Notice of Permit Applications Received under the Antarctic Conservation Act of 1978, P.L. 95-541.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by **[Insert 30 days from date of publication in the Federal Register]**. This application may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Room 755, Division of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

FOR FURTHER INFORMATION CONTACT: Nature McGinn, ACA Permit Officer, at the above address or ACApemits@nsf.gov or (703) 292-7149.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Public Law 95-541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

APPLICATION DETAILS:

1. Applicant

Permit Application: 2017-006

Joseph Wilson

Penguin Films Ltd

1 St Augustine's Lane

Bristol BS1 5DE United Kingdom

Activity for Which Permit is Requested

ASPA entry. The applicant requests entry to Cape Crozier, ASPA 124, and Cape Royds, ASPA 121, in order to film an Adelie penguin documentary film for Disney. The applicant and team would use long lens filming techniques, which allows the camera person to be at a distance from the animals to capture natural behaviors. The work would be observational and would not involve interactions with penguins. The team would be working with penguin scientists who conduct work in Cape Crozier and Cape Royds.

Location

Cape Crozier, ASPA 124; Cape Royds, ASPA 121

Activity for Which Permit is Requested

Take. The applicant is planning to make photographs at terrestrial continental and island locations on the east and west sides of the Antarctic Peninsula, where seabirds roost and breed, to document and observe changes in the physical characteristics of those habitats and the distribution and abundance of seabirds that

use them relative to local and regional changes in environmental conditions. The applicant states that brief, minor, incidental disturbance to behaviors of seabirds might be possible, though unlikely, owing to auditory or visual detection by the seabirds of a camera-equipped (*e.g.* GoPro) aerial telerobot as it passes quickly overhead while making photographs. The remotely operated, battery powered, multi-rotor model aerial telerobot (*e.g.* DJI Phantom 3 Pro) will be operated from a Zodiac offshore, or from locations on beaches. The aerial telerobot will be operated within line of sight distances (<400 m) and altitudes of 30 to 100 m and for 10 to 20 minutes during each flight. One flight will be made at each location visited and each location will be visited one to three times each year during the Austral summer (October to March). The applicant has applied for a permit to take the following species and numbers of birds: less than 30 per year of gentoo penguin (*Pygoscelis papua*), rockhopper penguin (*Eudyptes crestatus*), chinstrap penguin (*Pygoscelis antarctica*), and Adelie penguin (*Pygoscelis adeliae*); and less than 20 per year of brown skua (*Catharacta lonnbergi*), south polar skua (*Catharacta mccormicki*), sheathbill (*Chionis alba*), blue-eyed shag (*Phalacrocorax atriceps*), southern black-backed (kelp) gull (*Larus dominicanus*), and Antarctic tern (*Sterna vittata*).
